INVESTMENT GUIDE TO THE JIZZAKH REGION UZBEKISTAN

TASHKENT – 2011

UNDP

United Nations Development Programme is the UN's global development network, an organization advocating for change and connecting countries to knowledge, experience and resources to help people build a better life. We are on the ground in 166 countries, working with them on their own solutions to global and national development challenges. As they develop local capacity, they draw on the people of UNDP and our wide range of partners.

Uzbekistan

The investment guide has been published with assistance of the UNDP project "Support to foreign Trade and Investment Promotion in Uzbekistan", implemented in association with the Ministry of Foreign Economic Relations, Investments and Trade of the Republic of Uzbekistan.

I. GENERAL INFORMATION

Geographical Position: Jizzakh region is located in the central part Uzbekistan between rivers Syrdarya and Zaravshan; the region has common boundaries with Republic of Kazakhstan and Syrdarya region in the north and north-east; with Republic of Tajikistan in the south-east, and with Navoi and Samarkand regions in the west and south-west.

Area: 21,200 km² or 4.8% of the total country area. The arable area is 1.3 million hectares.

Population: 1.1 million people.

Dynamics of Population, 000 people					
1979	1990	1995	2000	2005	2010
511	773	911	997	1057	1117,3

Climate: continental, with relatively mild winter and long hot summer.

Average Monthly Air Temperature, °C

79	77	72	62	53	40	42	45	49	59	70	78

Natural Resources: the region has two large natural lakes: Aydar Kol and Arnasay where fishing industry is developing. Many minerals and metals are mined here: gold, silver, tungsten, iron, molybdenum, basalt, granite, and gypsum. Large deposits of minerals used for construction materials like marble and limestone have been found.

Administrative Centre: : Jizzakh city

	Distance from Major Cities, km												
	Tashkent	Andijan	Bukhara	Jizzakh	Karshi	Khiva	Navoi	Namangan	Nukus	Samarkand	Termez	Fergana	Urgench

Administrative division: Arnasai, Bahmal, Galla-aral, Jizzakh, Dustlik, Zamin, Zarbdor, Zafarabad, Mirzachel, Pahtakor, Farish, Yangi-abad.

Transport: The total length of automobile roads is 2,540 km; of railways 280.5 km. The railways and automobile roads link the region with all major transport communication networks of Uzbekistan. This allows to carry out transportation of export and import goods to all strategic directions.

Educational Institutions: There are two tertiary educational institutions, 74 vocational schools, four academic lyceums, 553 secondary schools (including special), 189 kindergartens, and 23 nonschool educational institutions in the region.

Healthcare: 61 hospitals, 263 clinics, 14 resorts, 124 rural medicals, and 139 first-aid units function in the region.

Jizzakh region is a dynamically developing agricultural and industrial region of Uzbekistan, with an average annual GDP growth rate of 6.8 %. In the last ten years, cumulative growth has doubled.

GDP growth, %											
2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2010 /2000
104.2	106.5	110.0	110.2	108.6	108.3	107.6	107.6	108.3	106.9	110.2	212,4

Key industries in the region: *textile, food processing, milling, cereal, and forage; electricity industry; machinery building; construction materials production, chemical and petrochemical.*

Dynamic development in these industries prompted by adopted policy of modernization ensured a stable industrial growth during the last ten years.

Industry Growth, %											
2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	
122.7	119.9	130.3	115.1	108.6	131.6	109.7	109.2	109.0	105.4	114,9	

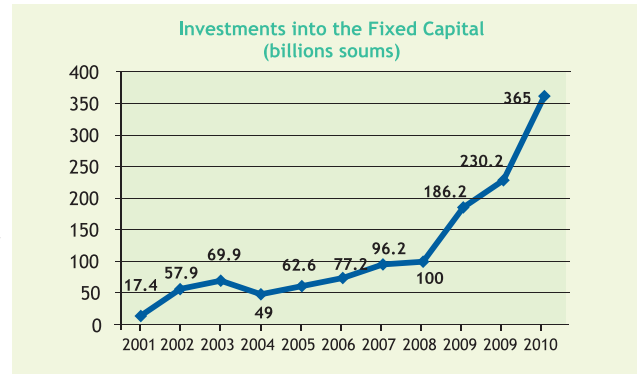

Agriculture has major influence over the region's development as it provides raw materials and supplies for textile and food processing industries. Main agricultural businesses units are farms, presently totaling 5,000. This number includes cotton and grain producers as well as farms specializing in cattle rearing, horticulture, apiculture, fisheries, and poultry husbandry. Governmental support and increased productivity at farms in the last ten years ensured an average annual growth rate of 7.8%.

Agriculture Growth, %											
2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	
100.1	106.9	113.2	116.6	114.0	106.2	106.5	106.7	104.2	104.1	106,1	

Recent trends demonstrate considerable predominance of the share of small businesses in economy of the region. Thus, in 2010 on its territory were registered 18,100 small businesses. The share of small businesses in the region's GDP has increased from 58.4% in 2005 to 77.3% in 2010.

Commissioning of new production capacities and construction of industrial and social infrastructure facilities have increased investment into the fixed capital.

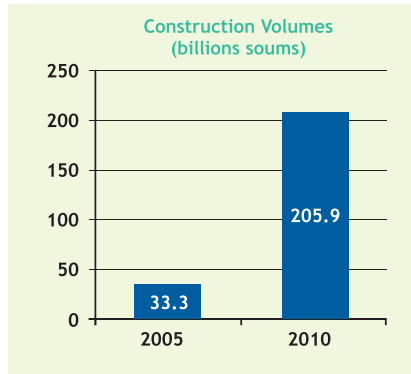

In 2010, 474,900 m² of housing, 319.3 km of water pipes and 57.6 km of gas pipes were constructed; a vocational school for 435 students and dormitory for 150 occupants were built; 1,392 small businesses created.

Since the Independence, foreign investments into the economy of Jizzakh region have increased to USD 230 million; 44 companies with foreign capital operate currently in the region.

Following industries are considered as a priority for attraction of direct investments into the economy of Jizzakh region:

1. Textile;
2. Silk-thread production;
3. Construction materials;
4. Processing of horticulture produce;
5. Foods processing;
6. Dairy and meats processing;
7. Chemical industry;
8. Fishing.
9. Apiculture
10. Tourism

Following high-priority projects will be implemented in Jizzakh region as specified in the Industrial Development Program in Uzbekistan for 2011 - 2015.

Project	Volume	Cost (MM)	Implementation Period
Textile			
Setting up spinning production at "A. Soatov LLC" and "PLASTEKS LLC" in the Jizzakh town	6,000 tons of yarn; 4,000 tons of jersey	34.0	2011-2013
Setting up a spinning production line at "Elegans Tex" JV in Jizzakh town	13.5 million m2 cloth; 1.58 million bed sets	28.0 4.0	2011-2012
Setting up spinning, knitting, and dyeing production in Jizzakh region	6,500 tons of yarn; 4,500 tons of jersey	34.0	2011 2012
Commissioning a textile factory in Jizzakh region	20,000 tons of yarn; 9,500 tons of jersey; 18.0 million knitted goods	67.0	2012-2014 2014-2015 2014-2015
Setting up hosiery production in Jizzakh region	24.5 million pairs of hosiery	8.2	2012-2015
Sub-Total		175.2	
Machinery Building			
Setting up calcium batteries production in Jizzakh town	800,000	9.5	2010-2011
Sub-Total		9.5	
Chemical			
Setting up production of sundry goods and children's toys; expanding range of plastic consumer goods manufactured at "Jizzakh Plastmassa" Company	582 tons	0.7	2011
Setting up production of polymers at "Jizzakh Plastmassa" Company	600 tons	1.5	2012-2013
Sub-Total		2.2	
Construction Materials			
Construction of cement works in Zafarabad district	2.0 million tons	250.0	2012-2015
Setting up a production line for white lime for facing materials in Jizzakh region	10,000 tons	5.0	2013-2015
Sub-Total		255	
Total		441.9	

III. PRIORITY SECTORS

TEXTILE INDUSTRY

Jizzakh region has huge potential for developing textile industry. The average annual yield of cotton crops in the region is 224,000 tons. The six ginneries of the region produce 71,100 tons of cotton fiber. Over 30 textile factories operate in the region on the raw cotton grown locally.

Successful investments into the textile industry of Jizzakh region are:

- «Forij textile» joint venture with the British «Patrolla World Wide» set up for production of cotton yarn, with a capacity of 3,000 tons a year.
- «Zilola-teks» Company set up for production of knitted goods.

Existing capacities in textile industry of Jizzakh region do not meet the amount of cotton crops grown. The region process only 6% (4,300 tons) of cotton fiber which is indicative of inadequate development of textile industry for the purposes of finished goods production.

Because of its significant raw cotton supply, Jizzakh region is keen on drawing investments into the textile industry, with the purpose of further growth in textile industry and production of knitted goods and clothes.

Within the next few years in the framework of the Industrial Development Program 2011 - 2015 it is planned to attract investments at total amount about USD 170 million into the textile industry of Jizzakh region.

SILK INDUSTRY

Recently accelerated development of the silk-growing industry in our republic has already brought its fruits.

Today, with the annual yield of 20,000 cocoons, Uzbekistan's share in the Central Asia silk-growing production is more than 80%, partly due to the ancient history of silk-growing here. Another powerful cause of such results is the improvements made in accordance with President Decree "On Further Reforms in Silk-Growing Industry".

Together with expansion of the silk-growing supply base, a program with participation of foreign capital is

successfully being implemented for upgrading of manufacturing facilities for silk threads and cloth.

Provisionally, there are 14 large silk thread manufactures and six silk cloths manufactures, with various types of ownership, in Uzbekistan.

Main producers of cocoons of Jizzakh region are based in Dustlik, Pakhtakor, and Mirzachul districts.

In 2010, a new production facility was commissioned at “Kuhinur” private firm, for cocoons processing and silk thread production, with an annual capacity of 80 tons.

Production of silk cocoons in Jizzakh Region				
2006	2007	2008	2009	2010
524 tons	490 tons	500 tons	555 tons	605 tons

PROCESSING OF HORTICULTURE PRODUCE

Jizzakh region has a large supply base for horticulture produce processing industry.

Dynamics of Horticulture Output					
	Unit	2007	2008	2009	2010
Melons and watermelons	ton	126,009	134,079	139,210	115,310
Vegetables	ton	175,344	194,786	203,170	184,273
Potatoes	ton	29,172	30,769	33,428	22,272
Fruits	ton	42,757	47,709	50,246	41,074
Grapes	ton	18,275	19,083	21,989	16,649

Provisionally, about 8,500 tons out of the grown produce is processed in the region. This does not reflect existing potential in horticulture produce processing as the horticulture output exceeds the processing capacities. In this regard, further investments into advanced horticulture processing industry is necessary, with the purpose of producing competitive on the world market goods, such as juice, jam, as well as frozen, lyophilized, and dry fruit.

Successful investments into the fruit and vegetable processing industry of Jizzakh region are joint ventures with foreign partners, such as *Uzbek-UAE «Baxmal Golden Apple» joint venture, Uzbek-British “Fruitvitex” joint venture, as well as «Sogda Tomat Konserva» and «AGRO GUMUSH».*

In 2010, more than 450,000 tons of fruit, vegetables, melons and watermelons were grown locally, out of which 6,760 tons were exported. Last year, those companies above exported about 1,500 tons of processed,

dry, and frozen products, which constitute 22.6% of the total export of horticulture produce.

Main importers of horticulture produce from Uzbekistan are Russia, Kazakhstan, and Turkey. In the last years, the exports expanded to include also Afghanistan, Iran, Iraq, China, Turkmenistan, Belarus, and Poland.

DAIRY AND MEAT PROCESSING

In 2011-2012, Uzbekistan plans to invest the equivalent of about USD 30 million into the meat and dairy processing industry of the country. In Jizzakh region, 22 projects are planned for implementation with a total cost of USD 5.1 million, including six projects for meat processing, with a total capacity of 1,400 tons a year, and 18 projects for dairy products, with a total capacity of 5,900 tons.

The program plans to set up, nation-wide, 223 new factories using mini-technologies and package equipment for meat and dairy processing, inclusive of 107 meat processing factories with a total capacity of 21,000 tons/year and 116 dairy factories with a total capacity of 57,800 tons/year.

Meat and dairy producers are granted tax and customs benefits till January 1, 2012, by the Presidential Decree. Imports of process line equipment together with spare parts and materials, as well as components and ingredients for meat and dairy processing not produced in Uzbekistan are exempt from customs duties.

The «Milk foods» livestock agribusiness was commissioned under the above program in Jizzakh region. The equipment was supplied and installed by the “Van der Ploeg International B.V.” Company from the Netherlands, the Swedish company “Delaval Export Service AB”, and “CONEXX Sp. z o.o.” from Poland.

Meat and Milk Production in 2007-2010, tons				
	2007	2008	2009	2010
Meat	102,259	110,234	116,999	88,707
Milk	276,091	290,013	314,499	274,245

The region has attractive investment offers in meat and dairy processing industry, for production of various sausages and national meat specialties, pasteurized milk, yoghurts, quality cheeses, etc.

PETROCHEMICAL INDUSTRY

Petrochemical industry is rapidly developing in Jizzakh region, the main catalyst in this development being foreign investments.

“Ripoltek-tekstil” Company with partners from Turkey set up production for polypropylene thread, the main material in textile and carpeting production. The production is made on Italian process lines; the daily production is 4 tons. Main users of the product are carpeting makers of Samarkand and Bukhara, Khiva and Fergana, Jizzakh and Chirchik.

«Sogdiana Pipe Plast» and «Zamonaviy Polymer Kuvur» joint ventures were set up for production of polymer

pipng. Production capacities of «Jizzaxplastmassa» Co. were upgraded which is a large manufacturer of polyethylene film, piping and other plastic products.

Commissioning of above facilities filled, to some degree, the construction market with piping for water, gas, and corroding liquids used both in housing and industrial setting (chemical, mining, pulp mills, and metallurgic plants).

“Didosa paints” joint venture based in Jizzakh region manufactures an assortment of construction varnishes and paints.

PRODUCTION OF CONSTRUCTION MATERIALS

Jizzakh region possesses significant amounts of raw minerals for construction materials industry.

Mineral Resources for Production of Construction Materials in Jizzakh Region		
Industry	Mineral Resources	Deposits and Estimated Reserves
Production of veneer building bricks	Loams	Galla-Aral deposit; loams reserves 40,904 tons
Production of facing materials	Marbleized limestone and marble	Four deposits; estimated mineral reserves 6129,800 m ³
Production of lime (calcinations)	Limestone	Jizzakh (Big Saddle) deposit; limestone reserves 7,285,000 tons
Production of construction materials	Argillaceous shale	Sayhan and Sayhan-2 deposits; reserves 6,696,000 m ³
Production of silicate goods	Sand	Obruchev deposit; reserves 2,882,000 m ³
Production of sand and gravel construction materials	Sand and gravel	Sanzar 2 and Ilanchisay deposits; sand and gravel reserves 2,707,000 m ³
Production of roofing tiles and bricks	Raw materials for roofing tiles and bricks	Eight deposits; reserves 26,026,000 m ³
Production of terracotta	Wollastonite	Koitash deposit; reserves 4,143,200 tons
Production of construction materials	Limestone	Khauzbulak deposit; reserves 1,132,000 m ³

There are more than 30 explored deposits of minerals; including suitable for commercial mining: wollastonite, barite, raw minerals used for cement production, stone veneer, clays suitable for production of terracotta, gypsum, haydite, lime, raw minerals for bricks, etc.

In the nearest future, within the Industrial Development Program of Uzbekistan 2011 – 2015 it is planned to attract investments for construction of a cement plant in Zafarabad district with a capacity of 2 million tons. The estimated required amount of investments totals USD 250 million.

Thus, existing raw minerals supply base for construction materials production ensures feasibility of investing into production of roofing tiles, wall facing materials, etc.

MACHINERY BUILDING

The machinery building industry in Jizzakh region is represented today by a modern Jizzakh Battery Plant, with the equipment supplied by world-class manufacturers such as DAGA, MAC, Virts, Lingklaitor, Propezi, Baer, Kambro, etc. Operating under franchise of the world-class manufacturer of car batteries, American “Exide Corporation”, this company manufactures low-maintenance and hybrid batteries, of both flooded-cell and sealed types, 55 to 190 ah, as well as maintenance-free cells for 35 to 55 ah covering everybody’s needs.

Within the Industrial Development Program in Uzbekistan it is planned to launch two projects for production of automotive batteries in 2011-2013.

In 2011, a production of calcium maintenance-free batteries will be started in Jizzakh town. The project cost is USD 9.5 million, with annual output of 800,000 batteries.

In 2012-2013, the Jizzakh Battery Plant plans commercial production of car batteries for new «GM Uzbekistan» models. This project is currently under preparation. Its estimated cost is USD 1 million; the expected output is 100,000 sets a year.

FISHING INDUSTRY

The region has two large natural lakes: Aydar Kol and Arnasay; where fishing business is rapidly developing.

Fishing Business Growth in 2007-2010, tons			
2007	2008	2009	2010
1,086	1,208	1,354	1,741

The shoreline of the lakes in five districts exceeds 380 km. Water resources are adequate here for setting up fresh-water fisheries, which will ensure marketing of fresh fish or setting up fish canning factories.

This industry grows rapidly and is considered high priority as the demand for fish is constantly growing. Hatcheries for commercial kinds of fish are being set up, one of them in Farish district. Forage supply is an important issue. To this end, the «Dustlikdon» company started production of fish forage with high protein content.

Provisionally, there is a number of fish processing joint projects with foreign investors including «Fora Seafoods» LLC, «Ost-Tennis», etc.

APICULTURE

In 2010, Uzbekistan produced a milestone 3,000 tons of honey. 213,487 beehives are owned by 5,328 households and 475 farm businesses.

In 2010, to develop and support those farms, they were transferred over 28,000 beehives, about 258,000 frames and other equipment. Furthermore, commercial banks issued 351.8 million soums in loans. To create favorable conditions for producers of this valuable product and to enhance the bee pastures for apiculture businesses, they were allocated additional lands: 440.3 hectares were transferred to 54 new proprietorships.

Jizzakh region is a major honey producer area in Uzbekistan. The honey production has increased four-fold in the last years.

Fishing Business Growth in 2007-2010, tons				
	2007	2008	2009	2010
Honey	64	192	222	242

A successful bee raising firm is “Zomin Asali” in Jizzakh district, currently possessing 270 beehives while increasing output every year. Their product is in demand in Jizzakh and other regions of the country. In 2010, this family business produced 9.5 tons of honey. «Zomin Asali» supplies its production to major supermarkets of Tashkent and Samarkand.

400 species of honey plants grow in Uzbekistan thus making successful bee raising a very feasible prospect.

TOURISM

Jizzakh region has potential for developing touristic infrastructure, especially in the nature reserves in Zaamin, Bakhmal, Galla-aral, Farish, and Yangi-abad districts. Vicinities of Zaamin and Bakhmal on the northern slope of Turkestan range are rich in mountain forests, deep valleys, and fast streams. A national park and nature reserve functions in the vicinities of Zaamin, where the nature is fully preserved.

The Zaamin Nature Reserve created in 1970 is considered a touristic attraction. On an area of 47,000 ha there are 60 various landscape zones: high lands, steppe, rocks, and canyons on the elevations varying from 1000 m to 4000 m above the sea level. The largest part of the park is covered by local variety of fir-trees that purify and emit healthy volatiles into the air. Famous pistachios called “the tree of life”, walnut trees, barberry, dog rose, sea buckthorn, and another 250 medical plants grow here in abundance. Circa 40 mammals’ species and 150 birds species live in the park. Many animals are protected, such as the white-nail bear, the Turkestan lynx, black storks, bearded vultures, golden eagles, boars, wolves, and foxes. The blue bird hiding in deep valleys has marvelously shining feathers. The karst caves in the National Park are amazing: for million years, billions of drops have turned into fantastic landscapes of stalactites and stalagmites.

Investment attractiveness of tourism will bring about creation of a network of small resorts and recreation facilities that would meet the world standards, development of active types of tourism (hunting, fishing, trekking).

The forests occupying over 78,000 hectares comprise local fir tree, broadleaf trees, walnut and fruit trees plantations, wild almond trees, etc. Vegetation growing on the mountain slopes can be used in medicine

and cosmetics industry.

IV. INVESTMENT CLIMATE

Since Independence, Uzbekistan as a whole has created a favorable investment environment, introduced a broad spectrum of legal protection measures and benefits for foreign investors, and developed systemic incentives for undertakings with foreign investors.

Following enactments constitute the legal basis for foreign investments in Uzbekistan:

- Law “On Foreign Investments”;
- Law “On Investment Activity”;
- Law “On Guarantees and Legal Protection of Rights of Foreign Investors”; and a number of regulations issued in the form of Presidential Decrees and Cabinet of Ministers’ directives.

As of today, various forms of investments are on offer for potential foreign investors:

- setting up joint ventures;
- setting up companies with 100% foreign capital;
- Acquisition of either part or entire interest in privatized enterprises.

Foreign investors in Uzbekistan are guaranteed investment conditions equally favorable to those that Uzbek legal entities and individuals are entitled to.

Additional guarantees and protections can be granted to foreign investors on an ad-hoc basis, for following types of investments:

- Into high-priority industries which ensure stable economic growth and positive structural changes in the country’s economy;
- Into high-priority projects which strengthen and expand export base of the country and its integration into the world market;
- Into small business projects aimed at processing raw materials, consumer goods and services production, and creating jobs for population.

On top of customs and tax benefits, equal for all companies resident in Republic of Uzbekistan, *Jizzakh region provides investment benefits for below industries when direct foreign investments are drawn in:*

1. *Manufacture of radio electronics finished goods and computer equipment components;*
2. *Textile;*
3. *Silk Industry;*
4. *Construction Materials Industry;*
5. *Poultry and egg agribusiness;*
6. *Food processing;*

7. Meats and dairy industry;

8. Chemical and pharmaceutical industry.

These industries are exempt from profit tax, property tax for legal entities, tax for improvement and development of social infrastructure, single tax payment, and mandatory payments to the Road Fund.

The state guarantees and protects rights of foreign investors carrying out investment activities in Uzbekistan.

If future enactments adopted by Republic of Uzbekistan deteriorate the investment conditions, laws and regulations applicable at the investment date will be applied to foreign investors for ten years from the investment date. Foreign investors are entitled to new laws and regulations that improve their investment conditions.

Notification requirement is stipulated in legislation regarding this ten-year guarantee. Thus, a foreign investor shall advise the relevant authorized body regarding guarantee applicability when the deteriorating investment conditions occur.

For further information contact www.investuzbekistan.uz

Why invest into Jizzakh Region?

- Availability of raw supplies for various types of production;
- Availability of qualified workforce;
- Availability of the infrastructure required for production;
- Advantageous geographical location from logistics perspective;
- Access to markets of neighboring countries and other CIS countries;
- Governmental support, benefits, and preferences.

V. PROJECT OFFERS

№	Project Title and Purpose	Project Cost (000 USD)
Production of Construction Materials		
1.	Construction of a cement plant in Zafarabad district, with annual capacity of 2 mln tons	250,000
2.	Setting up production of pressed marble tiling at «Zoirjon-bobo» private firm	1,503
3.	Upgrading and expansion of production of gypsum and alabaster at «Imorat ADA» private company	100
4.	Production of sandwich panels in Jizzakh city	1,000
Textile		
5.	Production of knitted goods at «Zilola Tex» Co. at Jizzakh city	1,500
Tourism		
6.	Construction of tourist facility in Yangi-abad district	3,400
7.	Construction of tourist camp in Forish district	550
Processing and storage of horticulture produce		
8.	Setting up production for 3,000 tons of fruit puree and 3,000 tons of tomato paste at «Jizak Invest Tayorlov Savdo»	1,800
9.	Processing of horticulture produce for export in Jizzakh city	1,500
10.	Setting up a refrigerated storage facility for fruit and vegetables, Jizzakh city	1,550
Food Processing		
11.	Setting up fishery and primary processing facilities with a capacity of 1,000 tons of fish products at «Zoirjon-bobo» private firm	400
Chemical		
12.	Setting up production for industrial oxygen with a capacity of 314,500 m3 at «Dilshod-T» in Jizzakh district	250

This list is constantly updated as new projects are selected and reviewed by departments of Ministry of Foreign Economic Relations, Investments and Trade and Economic department of Jizzakh region. You can also see the data regarding currently offered projects on the “Uzininvest” Agency website:

www.investuzbekistan.uz

CONSTRUCTION MATERIALS PRODUCTION

1. CONSTRUCTION OF A CEMENT PLANT IN ZAFARABAD DISTRICT WITH PRODUCTION CAPACITY OF 2 MILLION TONS A YEAR

I. LOCAL PARTNER

Title:	«UzStroy Materials» Inc.		
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan		
Manager:	E. M. Akramov		
Telephone:	(8-371) 152 20 63	Fax:	255 77 07
e-mail:	uzbild@ars.uz	web-site:	www.uzsm.uz

Available Infrastructure:

Automobile road	Jizzakh-Farish highway at 0.5 – 1.0 km distance
Railway road	Pakhtakor-Uchkulach rail road at 0.5-1.0 km distance
Power Supply	Construction of double circuit high-voltage 220 kV power line for 140 km from the Jizzakh 220 kV Sub Station (or the Sary-Bazar 220 kV Sub Station) is required, to the design 220 kV Sub Station
Water Supply	Water pipe in 10 km, under 2 kg/sm2 (atmosphere) pressures. Underground sources will be utilized. Mineralization 0.6-1.0 g/l, hardness 5.5-7.0 micromole/dm3, pH 7.8-8.0, contents: sulfate-magnesium and calcium.
Sewer	Construction of BIO sewage treatment plant required
Gas Supply	Main fuel is coal (heating value 5 250 ~ 5410 KCal/kg.)
Heating	To be defined by project

II. PROJECT DESCRIPTION

Objective

Construction of a cement plant in Zafarabad district, Jizzakh region, for 2 million tons of cement a year. The site was chosen near Chimkurgan village, Zafarabad district.

Benefits

The project will enable manufacturing of high-quality products marketable both on the local and world markets.

Brief description of the process:

Manufacturing of Portland cement from clinker comprises following procedures: grinding clinker, burning mineral additives, grinding gypsum mineral, dusting clinker together with active mineral additives and gypsum, and packaging and shipment of cement to the consumer.

Markets

About 45% of product will be marketed inside the country and circa 55% on the open market (Portland cements M-400, M-500)

Raw mineral availability

Kutarmin, Bazaygir, and Balyklitau limestone deposits are located at 1.5 – 2.5 km of the suggested plant site. Igneous rocks from Arvaten deposit (15 km) and Osmansay (20) will be used as a siliceous component, and quartz and feldspar or dune sands to increase SiO₂ content. Feldspar and dune sands are available at 20 km of the plant.

Raw mineral	Required amount	Local raw minerals	
		Amount	Price
Limestone	4 million tons a year		available locally
Igneous rocks (basalts)	392,200 tons a year		available locally
Dune sand	483,200 tons a year		available locally
Mineral additives:			
Gypsum	150,000 tons a year	1 ton	14,000
Burnt clays	270,000 tons a year	1 ton	12,000
Iron ores	38,500 tons a year	1 ton	31,000

Required Investments

Project cost	USD 250 million
Required investments	USD 250 million
Type of financing	Direct foreign investments
Investor's Contribution and Interest	USD 250 million for purchase of equipment, construction and installation, formation of working capital

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loaned	
		locally, million soums	Abroad, 000 USD
	250	-	-

Focus Areas of Investment

Expense Element	Expenses in local currency, billion soums	Expenses in hard currency, million USD
Purchase of equipment,		50
- made locally		
- imported		50
Construction of facilities and infrastructure	201.6 billion soums (USD 120 million)	
Purchase of heavy equipment and trucks	67.2 billion soums (USD 40 million)	
Construction and installation	42 billion soums (USD 25 million)	
Formation of working capital	25.2 billion soums (USD 15 million)	

Expected financial outcomes of the project, billion soums

Indicator	Implementation Stages

2. SETTING UP PRODUCTION FOR PRESSED MARBLE TILING AT “ZOIRJON BOBO” PRIVATE FIRM

1. Local Partner

Title:	“Zoirjon Bobo” Private manufacture
Legal address:	Jizzakh District, Jizzakh Region
Main activity:	Production of construction materials
Date of creation:	19.12.1994
Manpower:	16

2. Cost of Capital Stock

Cost of capital stock:	USD 131,200
Manager:	K. Sattarov (Director)

3. Products

Construction gypsum, construction lime, paving tiling, cinder bricks, marble chips

4. Project description

Setting up production for pressed marble tiling

5. Technical and economic indicators

Project amount:	USD 1,503,000
Required investments:	USD 1,503,000
Purpose of Investment:	purchase of equipment

6. Mineral Resources Available

Raw mineral:	Marble
Sources:	Purchased on the internal market

7. Markets for finished product

internal market, exporting

8. Infrastructure and Business Plan availability

Available infrastructure:	Water and gas supply, power supply, sewer
Distance to the railroad:	0.5 km
Access to automobile road:	Available
Business plan:	Not available

3. UPGRADING AND EXPANSION OF EXISTING PRODUCTION OF GYPSUM AND ALABASTER AT “IMORAT ADA” R&D PRIVATE FIRM

1. Local Partner

Name:	“Imorat ADA” R&D private firm
Location:	Jizzakh District, Jizzakh Region
Main activity:	Production of gypsum and alabaster
Manpower:	38

2. Cost of Capital Stock

Cost of capital stock:	USD 119,200
Manager:	A. Azimov (Director)

3. Project description

Upgrading and expansion of existing production of gypsum and alabaster

4. Technical and economic indicators

Project Amount:	USD 100,000
Required Investment:	USD 100,000
Target Area of Investments:	Upgrading of production line, formation of working capital

5. Markets for finished product

internal market, exporting

6. Infrastructure and Business Plan availability

Infrastructure:	available
Business Plan:	not available

4. PRODUCTION OF SANDWICH PANELS IN JIZZAKH CITY

I. LOCAL PARTNER

Title:	Suleyman Shahlan
Legal address:	Jizzakh region, Industrial site A
Manager:	Suleyman Shahlan
Telephone:	(+998 72) 329 61 99

Available Infrastructure:

Automobile road	Available
Railroad	Available
Power supply	Available
Water supply	Available
Sewer	Available
Gas supply	Available
Heating	Not available

II. INVESTMENT PROJECT DESCRIPTION

Objective

Organization of sandwich panels production with capacity 1000 m² a day in Jizzakh city.

Benefits

Project will produce high quality products marketable both locally and abroad.

Markets

70% of output on the local market; 30% of the output for export

Raw supply availability

For production of metallic and cement sandwich panels:

Local raw materials: cement, sand, lime, PVA adhesive, aluminum wire

Imported raw materials: metal galvanized steel plate, granules for production of foam plastic, glue, fiberglass net

Required Investments

Project cost	USD 1 million
Required investments	USD 0.5 million
Type of financing	Direct foreign investments
Investor's Contribution and Interest	USD 0.5mln for purchase of technological equipment

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loaned	
		locally, million soum	Abroad, 000 USD
835 (USD 500,000)	0.5	-	-

Focus Areas of Investment

Expense Element	Expenses in local currency, billion soums	Expenses in hard currency, million USD
Attracted investments		
Purchase of equipment,		500
- made locally		
- imported		500
Own funds		
purchase of facilities	835 (USD 500, 000)	

Expected financial outcomes of the project, billion soums

Indicator	Implementation Stages			
	1st Yr	2nd Yr	3rd Yr	4th Yr
Volume of rendered services, million soums	0.8	1.0	1.5	2.2

Return of Investments (in months)	4 years (48 months)
Design and Cost Estimate Preparation	Business plan prepared, Feasibility study to be developed

TEXTILE

5. PRODUCTION OF KNITTED GOODS AT “ZILOLA TEX” JSC IN JIZZAKH TOWN

I. LOCAL PARTNER

Title:	“Zilola Tex” JSC
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan
Manager:	B. Valiev
Telephone:	(8-372) 226 35 51

Available Infrastructure:

Automobile road	Highway at 0.5 – 1.0 km distance
Railroad	Rail road at 0.5-1.0 km distance
Power Supply	Available
Water Supply	Available
Sewer	Available
Gas Supply	Available
Heating	Not available

II. PROJECT DESCRIPTION

Objective

Production of knitted goods at “Zilola Tex” JSC in the town of Jizakh

Benefits

Project will produce high quality products marketable both locally and abroad.

Markets

40% of the output on the local market; 60% of the output on the foreign market

Availability of raw supply

Cotton yarn 100 % made locally

Raw mineral	Required amount	Local supply	
		Amount	Price
Cotton yarn	1,000 tons a year	1,000 tons	2.5 – 3.0 million soums

Required Investments

Project cost	USD 1.5 million
Required investments	USD 1.0 million
Type of financing	Foreign direct investment
Investor's Contribution and Interest	USD 1 million for purchase of process equipment, or 66.7% of the total project cost

Suggested Source of Investment

Own funds, million soums	Direct foreign investments, 000 USD	Loans	
		locally, million soum	Abroad, 000 USD
835 (USD 500,000)	1000	-	-

Focus Investment

Expense Element	Expenses in local currency, billion soums	Expenses in hard currency, 000 USD
Financed by investments		
Purchase of equipment, including:		1000
- made locally		
- imported from abroad		1000
Financed by own funds		
Purchase of facilities	835 (USD 500,000)	
Return of Investments (in months)		36 months
Status of Design and Cost Estimate Package		Not available

TOURISM

6. CREATION OF TOURISTIC FACILITIES IN YANGI-ABAD DISTRICT

I. LOCAL PARTNER

Title:	«Kobul Gulom Dilshod» LLC		
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan		
Manager:	K. Sattorov		
Telephone:	(+998 90) 539 23 52	Fax:	(8372) 226 36 75
e-mail:	fike0819@mail.ru		

Available Infrastructure:

Automobile road	Jizzakh – Tashkent highway, at 25-30 km distance
Railroad	Khavast railroad line, at 25 km distance
Power Supply	Available
Water Supply	Available
Sewer	Not available, not required
Gas Supply	Not available
Heating	Not available

II. INVESTMENT PROJECT DESCRIPTION

Purpose

Construction of a full-service touristic facility in Yangi-Abad District, for foreign and local visitors and rendering services related to ecological tourism, such as:

- Ducks hunting and fishing at a lake of 100 hectares;
- Recreation and entertainment under the open sky;
- Trips to Samarkand and Bukhara;

Benefits

Geographic location of the suggested site and a natural water reservoir warrants success of this project which involves provision of quality marketable tourism services both for local and foreign visitors.

Brief description of the process:

Following actions are suggested for setting up of a touristic facility in Yangi-Abad:

- Construction of ten huts for one family, with all modern facilities (furniture, air conditioner, TV, refrigerator, telephone, etc.);
- Purchase of two minivans and one sedan for trips to Samarkand and Bukhara;
- Construction of a café-bar, restaurant, and open-air pool;
- construction of two saunas;
- Construction of ten hunting houses (3x4m);
- Purchase of ten boats and motor boats for duck hunting and fishing;
- Construction of a power station, water pumps, and trunk sewer;
- Purchase of trucks and refrigerator trucks;
- setting up a fishery

Markets

60% of services will be provided to foreign visitors, and 40% to Uzbekistan citizens

Availability of Raw materials

Not required for setting up a touristic facilities

Required Investments

Project cost	USD 3.4 million
Required investments	USD 3.2 million
Type of financing	Foreign Direct Investment
Investor's Contribution and Interest	USD 3.2 million for construction of buildings and constructions, purchase of equipment, vans, light vehicles, trucks, heavy equipment, construction and installation, formation of working capital – 94% of the total cost

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loans	
		locally, million soum	Foreign, 000 USD
336 (USD 200,000)	3.2	300	-

Focus of Investment

Expense element	Expenses, million soums	Expenses in currency, 000 USD
Financed by Investment		
Purchase of equipment, furniture, electric supplies, and inventory for furnishing the buildings, including:		450
- made locally	336 million soums, (USD 200,000)	
- imported		250
Construction of buildings (cottages, a café/bar, a pool, and the hunting huts)	2,016 million soums (USD 1.2 million)	200
Construction of power station, water pumps, and sewer collector	200 million soums (USD 120,000)	80
Purchase of buses, light vehicles, trucks, and special equipment	252 million soums (USD 150,000)	200
Purchase of boats and motor boats		140
Construction and installation	570 million soums (USD 340,000)	120
Formation of working capital	168 million soums (USD 100,000)	300
Financed by own funds		
Preparation of approvals and constituent package	17 million soums (USD 10,000)	
Preparation of design and cost estimate documentation	84 million soums (USD 50,000)	
Landscaping	100 million soums (USD 60,000)	
Setting up a fishery at an area of 5 hectares	134 million soums (USD 80,000)	

Expected financial Results, billion soums

Indicator	Implementation Stages			
	1st Yr	2nd Yr	3rd Yr	4th Yr
Volume of rendered services, million soums	0.8	1.0	1.5	2.2
Return of Investments (in months)	4 years (48 months)			
Design and Cost Estimate Preparation	Business Plan prepared, Feasibility Study not prepared			

7. CREATION OF TOURIST CAMP IN FORISH DISTRICT

I. LOCAL PARTNER

Title:	OOO «Nuratau-Qizilqum Tur»
Legal address:	Jizzakh region, Forsih district, Uhum village
Manager:	S.Kurgonov
Telephone:	452-11-36

Available Infrastructure:

Automobile road	Available
Railroad	Not available
Power supply	Available
Water supply	Available
Sewer	Not available
Gas supply	Not available
Heating	Not available

II. PROJECT DESCRIPTION

Objective

Creation of touristic camp in Forish district (construction of recreation zone with tents) for foreign tourists and local population, rendering eco-tourism services.

Benefits

Geographic location of the suggested site for construction of tourist camp and ecological clean environment makes it attractive for investment.

Markets

Rendering services for foreign (40%) and local tourists (60%).

Required Investments

Project cost	USD 550,000
Required investments	USD 500,000
Type of financing	Direct foreign investments
Investor's Contribution and Interest	USD 500,000 for construction of facilities and purchase of equipment

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loaned	
		locally, million soums	Abroad, 000 USD
85 (USD 50,000)	500	-	-

Focus Areas of Investment

Expense Element	Expenses in local currency, billion soums	Expenses in hard currency, million USD
Attracted investments		
Purchase of equipment, furniture, electric supplies, and inventory for furnishing, including:		200
- made locally		120
- imported		80
Construction of necessary facilities with engineering communications infrastructure		300
Own funds		
Construction of facilities	85 mln soums (USD 50,000)	

Expected financial outcomes of the project, billion soums

Indicator	Implementation Stages			
	1st Yr	2nd Yr	3rd Yr	4th Yr
Volume of rendered services, mln soums	0.2	0.25	0.35	0.5
Return of Investments (in months)	4 years (48 months)			
Design and Cost Estimate Preparation	Business plan prepared, Feasibility study to be developed			

PROCESSING AND STORAGE OF HORTICULTURE PRODUCE

8. SETTING UP A PRODUCTION LINE FOR 3,000 TONS OF FRUIT PUREE AND 3,000 TONS OF TOMATE PASTE AT "JIZZAKH INVEST TAYORLOV SAVDO" LLC

I. LOCAL PARTNER

Title:	"Jizzakh Invest Tayorlov Savdo" LLC
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan
Manager:	B. Buzrukhodjaev
Telephone:	(+998 90) 265-12-62
Acquiring Bank:	Aloka Bank

Available Infrastructure:

Automobile road	Available
Railroad	at 0.5 km distance
Power Supply	available, 200 kW/A
Water Supply	available
Sewer	available
Gas Supply	available
Heating	Not available

II. PROJECT DESCRIPTION

Purpose

Setting up Production for 3,000 tons of fruit puree and 3,000 tons of tomato paste

Market demand for planned products

60% of the output will be marketed abroad and 40% on the internal market

Raw mineral availability

Raw produce: tomatoes, apples, apricots, plums, etc.

Required Amount of Investment

Project cost	USD 1.8 million
Required investments	USD 1.3 million
Type of financing	Foreign Direct Investments
Contribution and interest of local partner	USD 500,000 or 28% of total project cost for construction and installation, and formation of working capital
Contribution and interest of foreign partner	USD 1,300,000 or 72% of total project cost, for purchase of equipment

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loans	
		locally, million soum	Foreign, 000 USD
340 (USD 200,000)	1,300	500	-

Focus Areas of Investment

Expense Element	Expenses in local currency, billion soums	Expenses in hard currency, million USD
Purchase of equipment, including:		1,300
- made locally		
- imported		1,300
Construction and Installation	600	
Purchase of raw materials	-	-
Formation of working capital	235	
Return of Investments (in months)		36 months
Design and Cost Estimate Preparation		Business Plan not prepared

9. PROCESSING OF HORTICULTURE PRODUCE AND PRODUCTION OF EXPORT-ORIENTED PRODUCTS IN JIZZAKH TOWN

I. LOCAL PARTNER

Title:	«JizzakhMevasabzavotTayorlovsavdo» LLC
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan
Manager:	O. Daminov
Telephone:	(8 372) 226 39 60

Available Infrastructure:

Automobile road	Automobile road available, at 1~ 2 km distance
Railroad	Railroad at 5 km distance
Power Supply	Available
Water Supply	Available
Sewer	Not available
Gas Supply	Available
Heating	Not available

II. PROJECT DESCRIPTION

Purpose

Processing of fruit and vegetables (total capacity 3,000 tons) for marketing abroad, in Jizzakh town

Planned Markets

80% will be marketed abroad and 20% on the local market

Availability of raw materials

90% of raw produce will be provided by local farmers

Required Investments

Project cost	USD 1.500 million
Required investments	USD 1.2 million
Type of financing	Foreign Direct Investment
Investor's Contribution and Interest	USD 1.2 million or 80% of the total cost, for purchase of equipment, formation of working capital and construction & installation

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loans	
		locally, million soums	Abroad, 000 USD
500 (USD 300,000)	1,200	-	-

Focus Areas of Investment

Expense Element	Expenses in local currency, million soums		Expenses in hard currency, 000 USD
	From Investment		
Purchase of equipment, including:			800
- locally made			
- imported			800
Construction and Installation	252 (USD 150,000)		
Purchase of raw materials	588 (USD 350,000)		
From Own Funds			
Purchase of storage building	504 (USD 300,000)		
Return of Investments (in months)			36 months
Status of design and cost estimate documentation			Business Plan prepared

10. SETTING UP A REFRIGERATING FACILITY FOR FRUIT AND VEGETABLES IN JIZZAKH TOWN

I. LOCAL PARTNER

Title:	"JizzakhMevaSabzavotTayorlovsavdo" LLC
Legal address:	68-a Mirakilov Str., Tashkent, Uzbekistan
Manager:	O. Daminov
Telephone:	(8 372) 226 39 60

Available Infrastructure:

Automobile road	Automobile road available, at 1~ 2 km distance
Railroad	Railroad at 5 km distance
Power Supply	Available
Water Supply	Available
Sewer	Not available
Gas Supply	Available
Heating	Not available

II. PROJECT DESCRIPTION

Purpose

Setting up refrigerating facilities for fruit and vegetables storage for 2,000 tons, Freon system

Markets

45% of the fruit and vegetables will be marketed on the internal market and circa 55%, on the external market

Required Investments

Project cost	USD 1.550 million
Required investments	USD 1.250 million
Type of financing	Foreign Direct investment
Share and Interest by foreign investor	USD 1,250 million or 66.7% of the total cost, for purchase of refrigerators and equipment, construction and installation, formation of working capital

Suggested Sources of Financing

Own funds, million soums	Direct foreign investments, million USD	Loans	
		locally, million soum	Abroad, 000 USD
500 (USD 300,000)	1,250	-	-

Focus Areas of Investment

Expense Element	Expenses in local currency, million soums		Expenses in hard currency, 000 USD
	From Investment		
Purchase of equipment, including:			1000
- locally made			
- imported			1000
Construction and Installation	168 (USD 100,000)		
Purchase of raw materials	252 (USD 150,000)		
From Own Funds			
Purchase of storage building	504 (USD 300,000)		
Return of Investments (in months)			36 months
Status of design and cost estimate documentation			Business Plan prepared

FOOD PROCESSING

11. SETTING UP A FISHERY AND PROCESSING PRODUCTION FOR 1,000 TONS OF FISH PRODUCTS AT «ZOIRJON-BOBO» PRIVATE COMPANY

1. Local Partner

Title:	«Zoirjon-bobo»
Legal address:	Jizzakh district, Jizzakh region
Main activity:	production of construction materials
Date of creation:	19.12.1994
Manpower:	16

2. Cost of Capital Stock

Cost of capital stock:	USD 131,200
Manager:	K. Sattarov (Director)

3. Products

Construction gypsum, construction lime, paving tiles, cinder blocks, marble chips

4. Project description

Setting up a fishery and processing facility for 1,000 tons of fish

5. Technical and economic indicators

Project amount:	USD 400,000
Required investments:	USD 400,000
Return of Investment:	3 years

6. Availability of Raw materials

Materials:	Juvenile fish and forage
Source:	Purchase on the local market

7. Markets

Locally	10 %
Abroad	90 %

8. Availability of infrastructure and business plan

Infrastructure:	Water, gas, and power supply; sewer
Distance to railroad	0.5 km
Access to automobile road:	available
Business Plan :	Not prepared

CHEMICAL

12. SETTING UP PRODUCTION FOR INDUSTRIAL OXYGENE (314,500 M3) AT "DILSHOD-T" PRIVATE FIRM IN JIZZAKH DISTRICT

1. Local Partner

Title:	"Dilshod-T" private firm
Legal address:	Jizzakh district, Jizzakh region
Main activity:	Services (repair and installation of gas bottles)
Date of creation:	2005
Manpower:	4

2. Cost of Capital Stock

Cost of capital stock:	USD 60,000
Manager:	T. Akhmedov (100%)

3. Project description

Setting up production for 314,500 m3 of industrial oxygen

4. Technical and economic indicators

Project Costs:	USD 250,000
Required Investments:	USD 250,000
Return of Investments:	5 years

6. Availability of Raw materials

Raw materials	Atmosphere air
---------------	----------------

7. Markets

Internal Market	100 %
-----------------	-------

8. Availability of infrastructure and business plan

Infrastructure available:	Water supply, gas supply, power supply, sewer
Distance to railroad:	1.5 km
Distance to automobile road:	2.2 km
Business plan:	Prepared
